Projects

Foodies:

- Developed a website where users can search for food they're craving and a list of restaurants are displayed. A map with markers that show where the restaurants are in respect to the users location, are also shown.
- Utilized Yelp's API to return data to append to webpage
- HTML, CSS, JavaScript, and jQuery were utilized.
- Deployed Link: https://anniechen9025.github.io/Foodies/

Weather Dashboard:

- Developed website where current and 5 day weather forecast are displayed, based on user's search of a city. Information such as date, temperature, humidity, and much more are shown.
- HTML, CSS, Bootstrap, JavaScript, and jQuery were utilized.
- Deployed Link: https://dannyphan6.github.io/Weather-Dashboard/

Password Generator:

- Password Generator creates a password based on user-selected criteria when prompted for character types such as lowercase, uppercase, numbers, and special characters
- HTML, CSS, and JavaScript were utilized.
- Deployed Link: https://dannyphan6.github.io/Password-Generator/
